Experience

CGI **June 2024 – Present**

Associate Software Engineer *Bengaluru, India*

- Developed RESTful APIs for the Worktime Bank module to manage employee hours, leaves, and compensation.
- Implemented Training Module workflows for course creation, enrollment and cancellation, and classroom capacity validation.
- Built automated waitlist handling for training sessions.
- Integrated Apache Kafka to publish training events, enabling asynchronous notifications and decoupled system communication.
- Designed and executed tests with JUnit and Mockito, reaching 85%+ coverage and cutting post-release defects by 20%.

OpenText **September 2023 – March 2024**

Software Development Engineer Intern *India*

- Built an OCR pipeline with PaddleOCR to digitize handwritten forms, automating validations and improving accuracy to 87.3% while reducing processing time.
- Integrated PHI3 LLM to extract and correct critical data, significantly reducing manual errors.
- Developed a full-stack solution with React.js and FastAPI for real-time OCR processing and LLM integration, enhancing user experience.

Projects

LinkSphere | *Java, Spring Boot, Microservices, Neo4J, PostgreSQL, Kafka, Feign Client, Resilience4j*

- Designed and developed a scalable microservices-based networking platform using Java and Spring Boot, supporting user management, posts, connections, and real-time notifications.
- Implemented service discovery with Eureka, centralized routing via API Gateway, inter-service communication using Feign Client, and asynchronous event-driven notifications using Kafka.
- Built resilient and observable distributed systems using Resilience4j, Zipkin distributed tracing, and ELK Stack centralized logging with PostgreSQL and Neo4j for relational and graph-based relationship management.

BookMyStay | *Java, Spring Boot, JPA, Spring Batch, PostgreSQL, REST APIs, JWT, JUnit*

- Designed and implemented a Hotel Booking System with modules for hotel search, room inventory, booking, and payments.
- Developed RESTful APIs for hotel search, availability checks, booking workflows, and notifications.
- Integrated with Payment Gateway and Notification Service to enable secure transactions and automated booking confirmations.
- Implemented features like batch inventory updates, guest details handling, surge pricing, and booking status tracking to improve scalability, accuracy, and revenue optimization.

GymOps: Gym & Workout | *React, Node, Express, MongoDB, Tailwind CSS, Redux, JWT*

- Architected a cloud-based gym management platform, with features for automated billing, membership tracking and managing, using React, Node.js, and MongoDB.
- Built a scalable admin dashboard enabling real-time management of memberships, trainer schedules, and revenue analytics, increasing operational efficiency.
- Implemented secure user authentication and role-based access control using JWT, along with encrypted payment processing.

Technical Skills

Languages: Java, JavaScript, HTML, CSS, Python, SQL, NoSQL
Technologies/Frameworks: SpringBoot, Kafka, Redis, RESTful Web Services and APIs, GraphQL, Hibernate, JPA, React.js, Node.js, Express, MongoDB, MySQL, PostgreSQL, Git, CI/CD, Jenkins, Docker, JUnit, AWS Cloud
Soft Skills: Communication, Problem-Solving, Analytical Thinking, Teamwork, Innovative Thinking

Education

SRM Institute of Science and Technology **June 2019 – July 2023**

B.Tech. in Electronics and Communication Engineering *Chennai, India*
